

## **HSRA Awards 2023**

### **Research Impact Award:**

Research impact is awarded to the research project that has produced the greatest impact on human/ societal welfare, either by stimulating and opening new areas of further research or by contributing to the resolution of a critical problem facing Pakistan and the world at large. The objective is to recognize and reward the research endeavor that has produced a lasting impact on future research as well as clinical and / or socio-economic development in the country.

#### **Criteria:**

- Achieved societal impact based on research carried out at AKU over the past five years
- Quantifiable societal impact which has occurred over the past 5 years
- Developed collaborations at National and international levels
- Applicant should be either first or co-investigator on the project.

#### **Nomination Requirements:**

- Please write the cover letter up to 300-words in the [google form](#) with title of project and names of all members on the project with roles. Outline the contribution in the project and how this project has delivered tangible impacts which improved outcomes and changed lives for the better – enabling healthier, fairer and safer conditions for people from all walks of life. The project has led to development and / or change in policy / guideline / practice at institutional / national / international level.
