

HSRA Awards 2023

Technology & Innovation award:

This Award recognizes new thinking in research methodologies. It will be given to a submission describing a new methodology which adds to the body of research knowledge and significantly contributes to the way research is thought about and carried out. The award aims to bring deserved prominence and greater recognition to those whose excellence in the application of technology is making an outstanding contribution to research effectiveness in specific disciplines. For the purpose of this award, technology will be considered as any computer software/ digital health, hardware equipment or device, artificial intelligence and m health based application that has either been developed or adapted specifically for research, insights and/or analytics in basic, clinical, or population health sciences or health profession education.

The method/technique can be quantitative, qualitative or a mixture of both, and clearly demonstrating both the innovative nature of the work and outcomes.

It will be given to the paper/project that best demonstrates outstanding innovation in the application of software or technology for research in specific discipline, insights and analytics which has directly achieved a demonstrable improvement in the effectiveness of research delivered.

Criteria: (the innovation must meet at least one of the following)

- the introduction of a new technique or the stretching of an existing technique
- the application of an established technique from another discipline to the research environment

Nomination Requirements:

- Please write a cover letter up to 300-words in the [google form](#) describing the technology/ nature of innovation and its role in enhancement of the scholarship in the respective discipline. Also, fill other applicable fields of the form.
