THE AGA KHAN UNIVERSITY
Institute for Educational Development

Aga Khan University Institute for Educational Development, Pakistan

About the Aga Khan University Institute for Educational Development

Since its establishment in 1993, Aga Khan University Institute for Educational Development (AKU-IED) in Pakistan has played a transformative role in the field of education by producing high-quality teachers, teacher educators, and researchers. Its impact has been felt in Pakistan and other developing contexts, making it a valuable contributor to the education landscape.

Our graduates working in schools are known for their student-centered and interdisciplinary approach to teaching and learning and work as agents of change to improve the system and make best practices from around the world ubiquitous in Pakistan.

As an academic and research institute, we take immense pride in being producers of knowledge and cultivating the value of generating knowledge in our students. Numerous of our graduates are engaged in producing original work in the areas of teaching, assessments, educational policies and governance, and innovative pedagogies.

Message from AKU-IED Leadership

This directory is part of a rite of passage which captures our students becoming our alumni. To watch them move on, is both a source of pride and a bittersweet sense of nostalgia.

As an institution, we take immense pride in the success of our past graduates, who now serve in top-tiered private and public institutions in Pakistan and abroad. Having reached levels where they work as agents of change and educational leaders, they are a testament to the quality of education we provide. We are confident that our recent graduates will also excel in their professional careers, given their academic excellence, passion for the field, and love of learning.

We believe that they are ideal candidates for your organization, bringing with them a unique perspective and a strong work ethic.

Last but not least, we would like to acknowledge the work of our colleagues in the Communications (Janelle Dias, Syed Shaeer Ahmed, Aman Pirwani) and Education Offices (Shahzaib Karim, Naureen Dhanani, Aly Ahad Mawji) for making this compilation a possibility.

Dr Farid Panjwani
